

Your Disaster Recovery Headquarters

Bringing Custom DR Solutions To Businesses Large or Small

You simply can't afford to be down. Even in the event of a major disaster or other business disruption resulting in the temporary or long-term displacement of your primary location.

Canada Cloud Data Centre's brand new state-of-the-art 10,000 sq. ft. colocation and disaster recovery hot site is located strategically in a northern suburb of Toronto, Canada, far away from the congested downtown core yet comfortably within the hub of the Canada communications market.

Canada Cloud Data Centre has been built to facilitate all of your disaster recovery requirements, from DR readiness, to pre-determined scheduled testing to execution of an actual recovery in the event of a true disaster.

During a disaster you have other important things to focus on than trying to rebuild your infrastructure. Canada Cloud Data Centre helps take care of that for you.

Convenient Suburban Toronto Location

Canada Cloud Data Centre is easy to get to with plenty of free parking for your employees and customers to get back online quickly and securely in the event of a disaster.

What We Deliver

Canada Cloud Data Centre offers disaster recovery space, as well as additional portable space as required. Our facility is equipped to offer the four primary requirements of immediate disaster recovery: Office space, power, communications and required hardware.

Office space with Internet access, workstations and servers

Photocopier and printer access

Boardroom and meeting room facilities

Fully functional kitchen and restroom

Convenient location with free parking

Canada Cloud Data Centre

79 Brisbane Road, Toronto, Ontario M3J 2K3

Be prepared. Stay prepared. Stay in business.

Count On Us To Help Protect Those Who Count On You

Your employees, customers, shareholders and other stakeholders are counting on you to ensure profitability and business continuity.

To ensure your business is prepared for unforeseen events, Canada Cloud Data Centre offers comprehensive professional guidance in helping you develop effective IT readiness strategies that encompass the following, and more:

- documenting the LAN
- listing all necessary personnel for any type of event
- determining the exact steps to be taken, by whom and in what order, in a disaster situation

Spin Up Any Application or VM In The Cloud

No matter what kind of data you need to spin up, CCDC can help you. Applications, operating systems, third party SaaS, Veeam, StorageCraft, VMWare, Hyper-V, anything.
